I'm a 4th year Psychology and Public Health double major with a Health Policy & Management concentration and honors in public health. I'm planning to work for 2-3 years after graduation, hopefully in hospital administration, healthcare consulting, or research, before pursuing a Master's degree, likely an MPH, MBA, or joint degree. Originally I planned to do a Psych/Poli Sci double major, but decided on pursuing public health in my sophomore year. I have an interest in theater but do not plan to complete a theater minor. I also would recommend removing CS 61AS from my junior fall schedule, and possibly postponing one of the public health core classes from that semester for senior year.
